

# CHILD PROFILE

**Name:** Devin Abreu

**Age:** 5

**Background:**

Devin's was a gorgeous, perfect baby until he was nearly two. We began noticing he wasn't talking, wasn't interacting with other children, and didn't respond when he was called upon. He was engaging in echolalia (the constant repetition of words or phrases heard). Devin also walked on the tip of his toes. At the age of 3, he was finally diagnosed with autism. He displays characteristics such as avoiding eye contact, not open or accepting anything new, and has frequent temper tantrums.

Devin is now 5 years old. After a year of therapy, he has developed into a smart and loving child who loves to be tickled, hugs and kisses. Although he has improved tremendously he still has a lot of language and social difficulties.

We are looking for sponsors that would allow Devin to continue receiving therapy since our insurance doesn't cover it. Please support Angels Reach and all the efforts they do every day for our children. Our kids can learn but it takes time, knowledge, love and lots of help from people like you to make it happen.

---
