

Name : Angel and Sergio

Ages: 4 and 5

Background:

Angel and Sergio are two boys full of life, sweet, fun loving and very energetic.

Angel is a 4 year old, affectionate boy who was diagnosed with Autism Spectrum Disorder at the age of 2. He has only recently begun using any complete words. He still can not communicate his needs which contribute to his frustration and makes temper tantrums more frequent. He has received therapy that has helped him immensely, but he is not able to continue with them because he is no longer eligible for Medicaid. At his age he needs help with self-care skills and speech development.

Sergio presents strong signs of ADD/ADHD but yet to be diagnosed; he is now 5 years old. He attends Dade County Public Schools and is in an Inclusion Program. His hyperactivity & lack of attention makes it very hard for him to stay on task and/or stay focused. It is extremely hard for his mother and teachers to help him develop and show his academic strengths.

Both boys are cared for by a single parent, who is completely dedicated to helping her sons overcome their challenges. Please consider helping these boys to have a shot at normal development and be able to reach their maximum potential. Studies show that early intervention and intensive therapies are proven to be effective for children with these disorders, so the window is closing for both Angel and Sergio to experience the biggest impact from the below listed therapies.

Thank you for your support, every little bit helps.
